Subject TRAIL IMPLIMENTATION

September 11, 2010

Superintendent Ramos and others

After reviewing the NPS Final Implementation of ORV Trails in the Turner River unit, by going into the field and viewing maps provided by NPS at the ORVAC meeting the Park Service has not implemented a fair and workable trail system that's even remotely reasonable for access to all areas of the Turner River Unit. This could have and should have been done by adhering to the ORVAC committee recommendations, public input on the General Management Plan, such as creating secondary trails from primary's for accessing hunting areas or other recreational use areas, page 104 General Management Plan.

Most of the secondary trail implemented lead to private property camps but few if any lead to recreational areas or special hunting places. This is grossly inadequate and unfair for all ORV users.

The NPS may be trying to appease some by saying we will consider your requested trail at a later date but more than likely it's just a ploy and usually never happens, if so it's just a tidbit of what needs to be. I have not spoken to anybody including the majority of the ORVAC Committee members that think the NPS is implementing a reasonable adequate trail system for TRU and that is a fact.

Its not to late for the Park Service to restore unity,confidence and respect by correcting this inadequacy an doing the right thing by giving the ORV users a fair share more reasonable sustainable secondary trail mileage.

Sincerely
Bill Clark
VP.BCSA

Damon Doumlele,please post this response on the orvac web site under public comments.
